New housing for 29 Cheviot Street, Māngere

We wrote to neighbours in December 2019 to advise Kāinga Ora had lodged resource consent for this site. This letter is to inform you that Resource Consent for 29 Cheviot Street has been granted by Auckland Council. The old home sitting on this site is under-utilising the large sections, we want you to know how we are better utilising this section. Our website shows how the new, warm, dry homes being designed will be situated in the local environment.

29 Cheviot Street, Māngere	
Expected Completion: Summer/Autumn 2021	Planned: Houses
Architects': Pacific Environments	1x three Bedroom
Builders: Penny Home	1x Six Bedroom
Resource Consent: Granted	Next Steps: We'll be in touch when construction begins

The house removal process is currently planned. We wanted you to note the safety measure we are putting in place during the work to remove the old house.

Safety first

The first step in this process will be to safely remove the asbestos from these homes. Like many other homes of the era (and other types of building built pre mid-1980s), these properties do have some low risk asbestos that requires removal before demolition can begin. Independent tests have confirmed there is no risk to surrounding areas or neighbours.

Kāinga Ora has contracted an accredited asbestos-removal company to do this work. They will operate in accordance with NZ Asbestos Removal Guidelines to ensure the safe and efficient removal, transportation and disposal of the asbestos contaminated material. An information sheet is enclosed.

How long will the work take?

The removal of the asbestos is likely to take around two weeks. The start for the work has been deferred due to the Level 4 alert for COVID-19. We intend to have this work commencing at the earliest when we are able to recommence activities. The rest of the house removal process that follows is then likely to take just over a week. Earthworks and Construction of the new homes will follow.
