What is being built at Rankin Street

We are building five homes in this development; four two-bedroom homes and one five-bedroom home.

Off-street parking has been incorporated in the development and one of the homes will cater for people with mobility needs. This includes such things as level access and wider hallways.

The quality new homes will be fully insulated, with carpets, curtains, double-glazing, and they will be 6 Homestar rated for added sustainability and energy efficiency.

Who will live in the new homes

Couples and families are likely to be housed in the new homes. These will be long-term public homes, with priority given to those in greatest need. We will be taking into consideration individual factors, for example proximity to work, whānau, and education.
