

**10 November 2021**

## **Today, Kāinga Ora – Homes and Communities, released the Sustainability Financing Impact Report for the year ended 30 June 2021, recognising our continuous contribution to wellbeing.**

---

The Sustainability Financing Impact Report outlines the Sustainability Financing Transactions entered during the year, and how the proceeds have delivered positive environmental and social outcomes for our customers and New Zealand.

Our CFO, Matthew Needham said, “At Kāinga Ora, we are making progress to decarbonise our activities, build more resilient infrastructure and better support our communities through the transition to a low-emissions future”. Matthew also talks to the journey, “We are taking good initial steps, from piloting solar panel installations on our new houses, waste reduction targets, to increasing access to more sustainable transport options in our communities and enabling changes through the infrastructure we build”.

We are proud to announce Ngā Kāinga Anamata, meaning ‘homes of the future’, an innovative Kāinga Ora public housing pilot that tackles climate change in the built environment. The project was selected as one of 17 global sustainability projects to feature in the ‘Build Better Now’ virtual pavilion at the UN Climate Conference (COP26), 31 October – 12 November 2021.

Within the report we show how we have delivered against our set of performance metrics that are outlined in our Sustainability Framework, including supported houses built and homes delivered to a minimum 6 Homestar rating, among others.
