

15 July 2021

s9(2)(a)

OI 21 276

Thank you for your email of 18 June 2021 requesting the following information under the Official Information Act 1982 (the Act).

...how many local and imported modular homes Kaingaora have installed in the past and has plan in the future to install across NZ city/town wise

Kāinga Ora uses Off Site Manufacturing (OSM) to deliver houses and components of houses.

We currently have 455 public housing units in construction, as well as approximately 300 units under contract in our market housing developments using OSM methods.

Kāinga Ora does not have a geographic preference of where it uses OSM vs traditional building methods to construct houses, instead they are used where we are scaling up our housing delivery pipeline to meet demand. Our goal is to increase the use of OSM by 20 percent from 2021 onwards.

More information about what Kāinga Ora is building and where can be found at the following link <https://kaingaora.govt.nz/developments-and-programmes/what-were-building>.

Yours sincerely

Rachel Kelly
